

Kevin Pomfret Discusses Challenges Facing Small Satellites at USGIF Workshop

03.19.2018

On March 6, 2018, Kevin Pomfret participated on a panel that discussed the emerging challenges facing small satellites. Kevin discussed "geospatial law and policy concerns including privacy, retirement and disposal of systems, and intellectual property disputes when products are created with data from many different sources." To read an article about the workshop from the USGIF's *trajectory* magazine, click the link below.

Advances and Challenges for Small Sats: Industry and government experts discuss evolving ecosystem, hurdles, and what's on the horizon for small sats at USGIF workshop
